

ADEQ Public Records Request — May 27, 2026

Submitted via:

<https://azdeq.gov/records>

Requestor:

Maria Coffee

Request:

I am requesting all public records related to EValution Energy LLC's proposed cobalt processing facility and associated solar facility in Yuma County, Arizona, including but not limited to:

- Aquifer Protection Permit (APP) applications, draft permits, issued permits, and permit correspondence.
- Hydrogeologic studies and groundwater investigations.
- Groundwater source identification and aquifer evaluations.
- Well registrations, well construction information, pumping capacity information, and groundwater withdrawal estimates.
- Water balance calculations, including documentation supporting the statement that approximately 70% of water will be recycled and reused.
- Documentation identifying the disposition of the remaining approximately 30% of water not recycled.
- Groundwater monitoring plans and monitoring reports.
- Sustainable yield analyses, groundwater drawdown analyses, recharge analyses, and impact assessments.
- Process water management plans, wastewater management plans, evaporation pond plans, and discharge analyses.
- Agency comments, technical reviews, and responses related to groundwater, water supply, aquifer impacts, and long-term water sustainability.

Please include records associated with parcel numbers 188-20-001 and 188-20-002 and any records referring to the cobalt processing facility, battery materials facility, EV battery recycling facility, or related industrial operation.
