Dear Ms. Celestina,

Thank you for your detailed response and for taking the time to provide additional information and resources. I appreciate your explanation regarding the Lower Gila Groundwater Basin, the Wellton-Mohawk Subbasin, and the regulatory status of the area.

I was particularly interested in your statement that ADWR was able to locate the legal authority on file for the wells being drilled in connection with the proposed EValution facility.

Would it be possible to provide the well registration numbers, permit numbers, or any publicly available records associated with those wells so that I may better understand the groundwater source and related studies?

Thank you again for your assistance and for directing me to additional resources.

Sincerely,

Maria Coffee
