Good morning,

I think the information on 55-303321 has not been populated yet because it is actively being drilled. The date of the beginning of construction appears to be 05/2026, so once they have an exact location for it and finish drilling, you will see it on the registry.

You can use our [Imaged Records](#) to locate some more information if you can't find it on Wells Registry. All of these resources are on our website.

Cameryn
