Question Regarding Well Registration Number 55-303321

Hello Cameryn,

Thank you for providing the well registration numbers associated with the EValution facility.

I was able to locate information for wells 55-240408 and 55-302618. However, when I search for well registration number 55-303321 in the ADWR Well Registry, the system returns "No registry wells found."

Could you please verify that 55-303321 is the correct registration number or provide any updated information regarding that well?

Thank you for your assistance.

Maria Coffee
