Greetings Darren,**Thank you for the opportunity to speak during the June 1st Board of Supervisors meeting.****Several of us have questions regarding the proposed EValution cobalt processing facility in the Tacna area. We believe a dedicated public informational meeting would be beneficial so that community members can better understand the project and receive answers to questions regarding water use, infrastructure, emergency response, environmental impacts and long-term community benefits.****A group of us have been gathering publicly available information, but many of our questions remain unanswered. During the meeting you indicated that you would follow up regarding this request. I was hoping you might be able to provide an update or a tentative time line for a future informational meeting. A time line would be especially helpful, as I will be traveling to Oregon for business at the end of June, and I do not expect to return until early November.****I believe residents of the area would benefit from a public informational meeting where questions can be addressed and information can be shared openly with the community.****Thank you for your time and consideration.****Respectfully,
Velma Limmeroth
