Follow-Up Regarding Environmental Permitting and Waste Management Information

Hello Julian,

I am following up regarding my previous inquiry.

Since submitting that request, I have learned that groundwater testing for the proposed EValution cobalt processing facility is ongoing and that **waste generated by the facility is expected to be transported off-site for disposal.**

Could you please advise whether ADEQ has received, reviewed, or expects to receive any materials related to:

- Waste characterization or waste classification.
- Wastewater management.
- Groundwater protection measures.
- Aquifer Protection Permit (APP) applications or pre-application discussions.
- Industrial waste disposal plans.
- Environmental permitting associated with waste handling, storage, or disposal.

If ADEQ is not the appropriate agency for these questions, I would appreciate any guidance regarding the correct agency or contact.

Thank you again for your assistance.

Maria Coffee
