Dear Supervisor Simmons,

Thank you for your continued attention to the questions raised regarding the proposed EValution cobalt processing facility.

Velma Vlimmeroth shared with us that she recently spoke with you regarding the possibility of a future public informational meeting. We appreciate your willingness to help facilitate communication between the community and the various agencies and organizations involved.

To ensure that we have correctly understood the information discussed, would you be willing to confirm whether the following reflects your current understanding?

- A public informational meeting is being considered for approximately November 2026.
- The meeting may include representatives from EValution Energy, Wellton-Mohawk Irrigation and Drainage District (WMIDD), transportation agencies, environmental or conservation interests, and other relevant stakeholders.
- The purpose of the meeting would be to provide information and allow public questions regarding topics such as water resources, transportation, infrastructure, environmental considerations, waste management, emergency response, and community impacts.

If any of the above should be corrected or clarified, we would appreciate your guidance.

Thank you again for your time and your efforts to facilitate constructive public discussion.

Sincerely,

Maria Coffee
