Hello Julian,

Thank you for your response.

Can you please confirm whether ADEQ has received any Aquifer Protection Permit (APP) application, draft application, permit review, groundwater study, hydrogeologic report, wastewater management plan, or other environmental permitting materials related to the proposed EValution cobalt processing facility near Tacna, Arizona?

If records may exist under a different facility name, permit number, legal entity, or project identifier, I would appreciate any guidance regarding the appropriate name or agency to contact.

Thank you for your assistance.

Maria
