Follow-up Regarding 2022 ADEQ Communications

Dear Samantha,

Thank you again for your response.

I have since located the **October 2022 Yuma County Special Use Permit application** for the proposed EValution Energy project. However, I have not found any documentation regarding the communications between the project and ADEQ that you and Wendy referenced.

You mentioned that ADEQ's community liaison program had discussions with the facility and/or Yuma County in 2022 regarding the environmental permitting requirements for the project.

Could you please let me know whether ADEQ has any records of those 2022 communications, such as emails, meeting notes, correspondence, or any permit review documents identifying the state environmental permits that would apply to this project? If those records are public, I would appreciate guidance on how I may obtain them.

I am trying to better understand the project's environmental permitting timeline and how the required permits were identified.

Thank you for your time and assistance.

Kind regards,

Maria Coffee
