Maria:

Regarding a Public Records Act Request, please send a letter with a verifiable signature listing in bullet form the specific documents or information you are requesting, and per the Statute, state the purpose of your request (commercial use, legal discovery, or public interest). You may either mail the letter to my attention at the address below or email a copy to me.

Thank you;

Elston Grubaugh

Manager – Secretary

Wellton-Mohawk Irrigation and Drainage District

Message: Public Records Request – EValution Energy Test Well and WMIDD Participation Dear Wellton-Mohawk Irrigation and Drainage District, I am researching the proposed EValution Energy cobalt sulfate production facility near

Wellton and am requesting access to public records relating to the District's involvement with the project. According to the *Yuma Sun* (May 31, 2026), WMIDD contributed approximately **\$95,000** toward drilling and evaluating the project's test well. I am interested in understanding the purpose of that contribution and the information available to the District regarding the proposed facility. If available, I would appreciate copies of any public records relating to this project, including: * Board meeting agendas, minutes, resolutions, or presentations discussing EVELution Energy or the proposed cobalt sulfate facility. * Staff reports or recommendations concerning the District's participation. * Agreements, contracts, memoranda of understanding, or other documents between WMIDD and EVELution Energy or its representatives. * Records explaining the District's decision to contribute approximately \$95,000 toward drilling and evaluating the project's test well. * Engineering, hydrogeologic, feasibility, or technical reports prepared for or received by the District concerning the wells or the proposed facility. * Documents describing the purpose of the test wells, anticipated groundwater use, projected water demand, or proposed water supply for the facility. * Any documents discussing future ownership, operation, or potential transfer of the wells. * Correspondence between WMIDD and EVELution Energy, the Arizona Department of Environmental Quality (ADEQ), the Arizona Department of Water Resources (ADWR), Yuma County, or any other governmental agency relating to the proposed project or the test wells. If these records are available online, I would appreciate being directed to them. If a formal Arizona Public Records Request is required, please consider this email my request and let me know if there are any applicable fees before processing. Thank you for your time and assistance. I appreciate your help and look forward to your response. Sincerely, Maria Coffee
