Ms. Coffee,

On behalf of Director Buschatzke, thank you for your message. We appreciate you reaching out about this project and making sure that we are aware. For all related groundwater well applications, and any other applicable permits for this project, ADWR will continue its review process in a transparent manner, consistent with the law. Feel free to reach out to Department staff if you have any specific questions or concerns that we can assist with.

Respectfully,

--

Hello Trent,

Thank you again for your response and your offer to answer questions.

I have one specific question regarding the proposed EValution Energy project.

Has ADWR received or reviewed a groundwater-flow model (such as a MODFLOW model), drawdown analysis, or any other hydrogeologic study evaluating the long-term effects of the proposed groundwater withdrawals?

If so, is that study available as a public record?

Thank you for your time.

Maria Coffee

Hi Maria,

We have not received any groundwater flow model, drawdown analysis, or other hydrogeologic study for the proposed groundwater withdrawals for this project. I will note that these are not necessary for well permits outside of Active Management Areas (AMA), but they could choose to provide such details if they wish.

Trent
